IN A NARROW MARKET

STOCK PRICES GENERALLY DECLINE

TO THE CLOSING HOUR.

A Few Salient Points of Strength on

the Government Crop Report—

Conditions in Monetary Circles.

NEW YORK, June 11.—The desultory

movement of prices in today's stock

market demonstrated the professional character

into which it has again relapsed. The

volume of dealings fell back near to the level

which was reached previous to last week's

spurt of speculative activity. The

market, which had been expected to become

congested in a few stocks. The

strength of these had some influence in

sustaining the general market, but this

was in the latter part of the day. The

opening made a good show of strength in

the combined influence of favorable in-

terpretation of the government crop report,

published after the close yesterday, and the

rumors which came thick from London

that peace was imminent in South Africa.

The crop report had the greater effect on

account of the short selling which has been

done by the bears during the past week. In

expectation of a shooting of great de-

cline in the crops. Notwithstanding the

decline in condition of the winter wheat

crop during the month and the decrease in

acreage of the spring wheat crop, experts

are able to figure a bumper crop on the

government showing. The rains which have

fallen since the first of the month, which

is the date of the government's computation,

were also taken as an off-setting factor

for the unfavorable features of the re-

port. The short covering which developed

yesterday afternoon was, therefore, con-

tinued with energy this morning. There

was an attempt, nevertheless, to distinguish

in detail the effects of the reports as bear-

ing on different stocks. The spring wheat

grangers were, consequently, strong, while

the Texas, Missouri and Kansas lines

held back. A sharp raid carried Texas &

Pacific down 2 1/2 points from the high point,

and the whole market suffered under the

under the aggressive movement in Missouri

Pacific, which touched 12 1/2 points. This

stock touched 12 1/2 points, on well-defined ex-

pectations of a coming dividend. The ap-

pearance of the government's report, in

the directorate of the American Linseed

Oil Company was responsible for the

strength of the stock. The report, which

was issued, is said, will benefit from

the change. A number of the high-priced

speculators, who had been buying, were

Copper and American Tobacco, fluctuated

feverishly under the influence of what

was supposed to be a report of a new

discovery of oil in the Texas Panhandle.

There were some sharp advances in less promi-

nent stocks, including American Express, North

American, General Electric, Virginia-Carolina

Chemical, and others. The market was

free from disturbance, but reports of a

transfer of securities from the American

Linseed Oil Company to the American

Tobacco Company, which had been in

the hands of the latter, were taken as a

sign of a new era in the company's

management. The market was
